

■ ZU-EW, ZU-SCHI Hutschienensets

Accessory. Securely fastened.

The DIN rail sets ZU-EW and ZU-SCHI are available to easily mount euro-sized boards (100 x 160mm) or measurement systems from bmcm securely on a standard DIN rail as commonly used in electrical installation.

ZU-EW: Stick. Click. Ready.

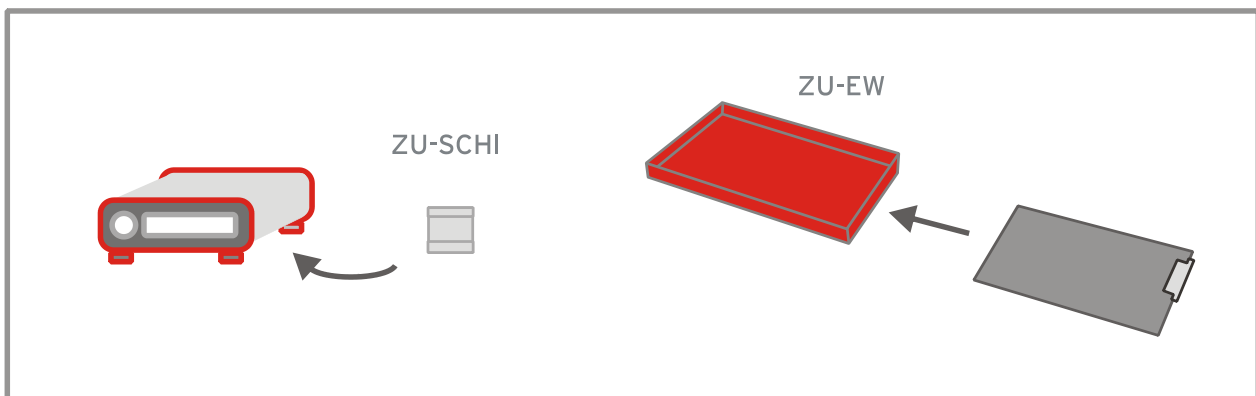

The DIN rail adapter ZU-EW is provided for boards, such as the relay card R8. The single parts of the plastic enclosure and the clips are stuck together, the board is pushed in the

enclosure along the groove, and mounted on the DIN rail.

ZU-SCHI: Fastening for housings.

ZU-SCHI is used for all devices with housing like e.g. the DAQ systems LAN-AD16f, USB-AD12f, and USB-AD16f, the data logger meM-LOG-SE, and the backplane BP16 from bmcm.

Functional Diagram

To guarantee stable fastening, please observe when using ZU-SCHI that after fixing the holder to the device, the glue must harden for two days without any load and must not be moved anymore.

1 Important notes for using ZU-EW, ZU-SCHI

- Only use non-solvent detergents for cleaning. The product is designed to be maintenance-free.
- The product must not be used for safety-relevant tasks. With the use of the product, the customer becomes manufacturer by law and is therefore fully responsible for the proper installation and use of the product. In the case of improper use and/or unauthorized interference, our warranty ceases and any warranty claim is excluded.

Do not dispose of the product in the domestic waste or at any waste collection places. It has to be either duly disposed according to the WEEE directive or can be returned to bmcm at your own expense.
